### INVITATION

Dear colleagues and friends,

For over a century, we are together fighting a war against sarcomas. Despite all our efforts and recent insights into the molecular landscape of these tumours we are still unable to cure the majority of our patients. The meeting will therefore focus on new multidisciplinary treatment approaches.

We are honoured to host the 33rd Annual Meeting of the European Musculo Skeletal Oncology Society with 21st EMSOS Nurse and Allied Professions Group Meeting from May, 13 – 15, 2020 in Graz. It is a beautiful, UNESCO protected city in the southern part of Austria embedded in a wonderful countryside, and easily reachable by plane, train or car. It is well known as a University city with a strong background in medical research. Furthermore, Graz is a place with unique cultural and culinary heritage, providing ideal background for scientific discussions in a friendly (after-hour) atmosphere.

Below are listed the main topics of the meeting

- Limb sparing surgery vs. amputation
- Liquid biopsy
- New guidelines and EMSOS studies on sarcoma
- Proton & carbon ion treatments for sarcoma
- Treatment of infected mega prostheses
- What's new in the systemic treatment of soft tissue sarcomas?
- Oligometastases: should they be treated differently?
- Statistics and sarcomas: how can modern statistics be useful?
- Difficult case discussion
- Sarcoma research: new mouse models, in vitro 3D sarcoma models
- Personalized medicine for sarcoma?
- The role of pathology in the era of next generation sequencing
- Update in the treatment of abdominal sarcomas
- Treatment of metastatic disease

We cordially invite you to be a part of this conference and to contribute to its success!  
We look forward to welcoming you and sharing an unforgettable time with you in Graz!

With our best regards,

Andreas, Bernadette, Birgit, Joanna & Beate
